To,

Sanjay Tools & Adhesives,

X 20 MIDC AMBAD,

NASHIK 422010.

Dear Mr. Mandar Gokarn,

We are thankful to you for recommending Hangsterfer's product S787 for Inconel and Stainless Steel machining on OKUMA multitask machine. We could achieve following benefits by using Hangsterfer's S787.

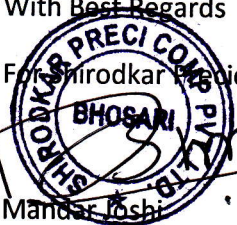

- 1) Tool life improvement on Solid Carbide tools between 40 to 50%
- 2) Tool life improvement on Carbide inserts between 25 to 30%
- 3) Reduction in consumption from 500 ml per day to 250 ml per day.
- 4) No foaming even at high pressure.
- 5) Machine cleanliness is improved.
- 6) Coolant remains in good condition without bad smell even after long non operational intervals.

We could improve productivity and reduce consumable costs due to avoidance of frequent tool and coolant change.

Thanks once again.

With Best Regards

For Shirodkar Preci Comp Pvt.Ltd.
