# CoroPlex™ TT

Two turning tools in one

B

## Application

- External turning
- Internal turning
- Profiling

C

ISO application area:

D

## Benefits and features

- Reduced tool changing time
- Quick change with Coromant Capto®
- Coolant solution for multi-task machines
- Flexible tool holders optimized in length, stability

E

CoroPlex TT is a twin tool with great flexibility. With two turning inserts on the same tool, substantial tool changing time is saved. CoroPlex TT gives you a variety of solutions for most turning operations.

SANDVIK  
Coromant

# CoroPlex™ TB

Multifunctional turning boring bar dedicated for multi-task machines and turning centres.

## Application

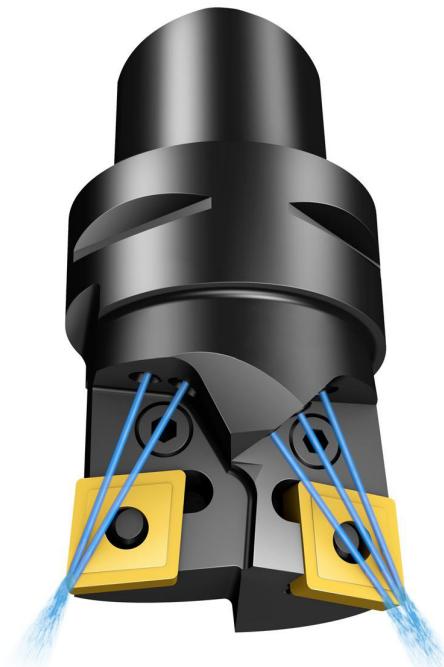

- Integrated solutions for turning centers:  
High volume, such as automotive transmission, bearings etc.
- Modular solutions for multi-task machines and large turning centers,  
such as oil and gas

ISO application area:

## Benefits and features

- Chip control and longer tool life
- Reduced set-up times with Coromant Capto®
- Quick tool changing for reduced machine downtime
- Reduced maintenance and downtime costs
- Quick change and modularity with Coromant Capto®
- Two inserts in the same tool
- Increased number of tool positions

[www.sandvik.coromant.com/coroplextb](http://www.sandvik.coromant.com/coroplextb)

Right hand style shown unless otherwise stated

## Inserts

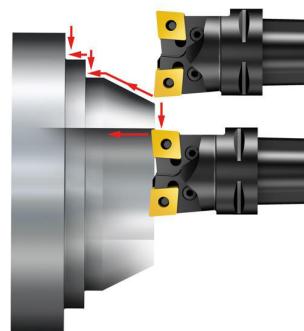

- T-Max P - C style inserts
- Insert geometries and grades for all materials

## Tools

- Coromant Capto® cutting units

## Application example - Speed gear with CoroPlex TB

The example shows how it is possible to use the same tool for turning of both the outer and inner diameter with no indexing time between the operations.

# CoroPlex™ MT

Multifunctional tool for milling and turning, dedicated for multi-task machines.

## Application

- Integrated solutions for turning centers:  
High volume, such as automotive transmission, bearings etc.
- Modular solutions for multi-task machines and large turning centers,  
such as oil and gas

ISO application area:

## Benefits and features

- Quick change and modularity with Coromant Capto®
- Increased number of tool positions
- One milling and two turning tools in one
- Reduced tool changing time
- Saves tool pockets in tool magazine
- Stationary application as a turning tool, external or internal

[www.sandvik.coromant.com/coroplexmt](http://www.sandvik.coromant.com/coroplexmt)

Right hand style shown unless otherwise stated

## Inserts

- CoroTurn 107 C and D-Style inserts
- CoroMill 390 inserts, see rotating tools catalogue

## Tools

- Coromant Capto® cutting units

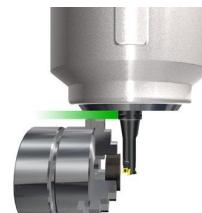

## One tool for both rotating and stationary use

The CoroMill 390 inserts are positioned slightly ahead of the CoroTurn inserts – axially as well as radially – to guarantee that turning inserts are not in cut when the tool is applied rotating. It is therefore necessary, when internal turning of a blind hole, to stop feed and rotation before the CoroMill 390 inserts get in contact with bottom face.

## Tool lengths optimized for accessibility in multi-tasking

The tool bodies are extended by 65 mm compared to corresponding conventional tools, to allow freer use of the working positions possible in multi-task machining, without need for extensions. Length and design of the tool body are optimized for each Coromant Capto size to provide best accessibility relative to most common chuck sizes.
